REČ DOBRODOŠLICE

Ovog puta se okupljamo oko teme koja je temelj svakog napretka - Sinergije znanja i iskustva.

Često mislimo da je znanje samo informacija, a iskustvo samo vreme provedeno u radu. Međutim, prava snaga leži u njihovom prožimanju. Znanje nam daje viziju i pravac, a iskustvo daje težinu i primenljivost.

Danas, u svetu koji se menja brže nego ikada, teorija bez prakse ostaje apstraktna, dok praksa bez novih saznanja rizikuje da postane zastarela. Ovaj kongres je osmišljen kao prostor gde se te dve sile spajaju. Ovde će se sresti entuzijazam i energija mladih kolega i mudrost onih koji su decenijama u profesiji.

Naš cilj nije samo da razmenimo činjenice i podatke, već da kroz diskusiju stvorimo nove vrednosti. Imaćemo priliku da preispitamo naučeno, podelimo proživljeno i budemo pripremljeni da odgovorimo na izazove koje nam donosi budućnost.

Nauka nam daje definisane protokole, nove terapije i digitalne alate, ali tek iskustvo te hladne podatke pretvara u isceljenje. Taj spoj usavršimo kroz multidisciplinarnu saradnju i razmenu iskustava, kako bi dostignuća savremene nauke postala standard pored bolesničke postelje.

„Znanje je blago, ali je praksa ključ koji ga otključava.“

Kažu da je znanje svetlost koja nam osvetljava put, a iskustvo kompas koji nas vodi kroz maglu neizvesnosti. Zato vas pozivamo da na ovom kongresu ne budete samo posmatrači, već graditelji zajedničke mudrosti.

Neka ovaj kongres ne bude samo niz predavanja, već dijalog onih koji veruju da je nauka bez ljudskosti hladna, a ljudskost bez nauke nemoćna. Dođite da zajedno gradimo mostove od dokaza i empatije, na mestu gde se priroda i znanje stapaju u savršen sklad.

Dobrodošli na Zlatibor, mesto gde vaša stručnost dobija širinu horizonta, a vaše iskustvo snagu planine. Neka ova razmena ideja bude početak novih visina koje ćemo dosegnuti zajedno.

Zlatibor vas zove da prođišemo istom mišlju i osnažimo zajednički cilj.

WORD OF WELCOME

This time we gather around the topic that is the foundation of all progress - Synergy of knowledge and experience.

We often think that knowledge is just information, and experience is just time spent working. However, the real strength lies in their permeation. Knowledge gives us vision and direction, and experience gives us weight and applicability.

Today, in a world that is changing faster than ever, theory without practice remains abstract, while practice without new knowledge risks becoming obsolete. This congress is designed as a space where these two forces come together. Here you will meet the enthusiasm and energy of young colleagues and the wisdom of those who have been in the profession for decades.

Our goal is not only to share facts and data, but to create new values through discussion. We will have the opportunity to review what we have learned, share what we have experienced and be prepared to respond to the challenges that the future brings.

Science gives us defined protocols, new therapies, and digital tools, but it's only experience that turns that cold data into healing. We perfect this combination through multidisciplinary cooperation and exchange of experiences, so that the achievements of modern science become the standard next to the bedside.

“Knowledge is a treasure, but practice is the key that unlocks it.”

They say that knowledge is the light that illuminates our way, and experience is the compass that guides us through the fog of uncertainty. That is why we invite you to be not only observers at this congress, but builders of common wisdom.

Let this congress not be just a series of lectures, but a dialogue between those who believe that science without humanity is cold, and humanity without science is powerless. Come and build bridges of evidence and empathy together, in a place where nature and knowledge merge in perfect harmony.

Welcome to Zlatibor, a place where your expertise gains the breadth of the horizon, and your experience the strength of the mountain. Let this exchange of ideas be the beginning of new heights that we will reach together.

Zlatibor invites you to breathe the same thought and strengthen the common goal.

*President of the AHWA RS “Eskulap”
Mirjana Blanuša*

REČ POKROVITELJA

Poštovane kolegice i kolege, dragi učesnici i uvaženi gosti,

Velika mi je čast da vas pozdravim ispred Balkanske asocijacije medicinskih sestara tehničara i babica kao i naučno stručnog odbora ovogodišnjeg stručnog skupa. Centralna tema našeg kongresa – „Sinergija znanja i iskustva“ – nije samo naslov programa, već suštinska filozofija napretka u savremenom zdravstvenom sistemu.

U vremenu u kojem se medicinska nauka transformiše brzinom koju je teško pratiti, pred nama je izazov: kako ostati tehnološki napredan, a ljudski dosledan? Odgovor leži u spajanju najnovijih naučnih dostignuća sa mudrošću stečenom godinama rada uz pacijente.

Program ovogodišnjeg kongresa osmišljen je da osvetli ključne tačke naše prakse kroz dijalog vrhunskih stručnjaka iz oblasti:

- **Onkologije i hirurgije:** Razmatraćemo sinergiju hirurške preciznosti i savremenih onkoloških protokola. Fokus je na multidisciplinarnom pristupu gde hirurgija postavlja temelj, a personalizovana onkološka nega osigurava put ka izlečenju.

- **Obrazovanja medicinskih sestara:** Razgovaraćemo o modernizaciji kurikulumu i važnosti kontinuiranog usavršavanja, kompetencijama medicinskih sestara kao i o usklađivanju sa Evropskim standardima i direktivama. Znanje je jedini put ka profesionalnoj autonomiji i autoritetu u kliničkoj praksi.

- **Kardiovaskularnih bolesti, anestezije, intenzivne nege i hemodijalize:** Kroz prizmu kardiovaskularnog koncepta, analiziraćemo kako timski rad lekara i sestara direktno utiče na preživljavanje i kvalitet života pacijenata sa kompleksnim vaskularnim patologijama. Poseban značaj će imati delokrug rada sestara u intenzivnoj nezi kao i značajnom segmentu kontinuiranih hemodijaliznih procedura u okviru njih.

- **Babica i Neonatologije:** Prvi otkucaji života. Ovaj panel posvećujemo onima koji drže ruku majke i prvi prihvataju novi život. Diskusija će obuhvatiti sinergiju tradicionalne babičke veštine i najsavremenijih neonatoloških protokola. Fokus je na humanizaciji porođaja uz maksimalnu bezbednost, gde iskustvo babice prepoznaje suptilne promene koje tehnologija nekada može prevideti.

- **Patronažne službe:** Sinergija u srcu porodice. Patronažna sestra je most između zdravstvene ustanove i doma. Na ovom panelu istražujemo kako se akademsko znanje iz oblasti javnog zdravlja transformiše u konkretnu podršku porodici. Razmatraćemo važnost rane intervencije, podrške dojenju i edukacije roditelja, gde patronažna služba postaje ključni faktor u prevenciji i očuvanju zdravlja čitave zajednice. Panel će osvetliti važnost preventive i edukacije porodice u svakodnevnom okruženju i ukazati na značaj javnog zdravlja.

Naša zajednička misija

Kongres je platforma na kojoj se susreću dva ključna stuba naše profesije: snaga inovacije (digitalizacija i dokazi) i snaga tradicije (etika i intuicija).

Verujem da znanje bez iskustva ostaje teorija, a iskustvo bez novog znanja rizikuje stagnaciju.

„Sinergija je energija koja nastaje kada se različitosti uvažavaju i spoje radi višeg cilja.“

Pozivam vas da tokom trajanja kongresa budete aktivni učesnici u razmeni ideja. Neka svaka panel-diskusija i svaki razgovor na pauzama budu korak bliže našem zajedničkom cilju – pružanju najkvalitetnije moguće nege svakom pojedincu.

Hvala vam što svojim prisustvom, radom i posvećenošću činite ovaj skup centrom izvrsnosti.

Želim vam uspešan, konstruktivan i inspirativan rad!

*Predsednik Balkanske asocijacije
medicinskih sestara tehničara i babica
Goran Mošić*

A WORD FROM THE PATRON

Dear Colleagues, Dear Participants and Distinguished Guests,

It is a great honor for me to greet you on behalf of the Balkan Association of Nurses, Technicians and Midwives, as well as the scientific and professional committee of this year's conference. The central theme of our congress – "Synergy of knowledge and experience" – is not only the title of the program, but the essential philosophy of progress in the modern health system.

At a time when medical science is transforming at a rate that is difficult to keep up, we are faced with a challenge: how do we stay technologically advanced and humanly consistent? The answer lies in combining the latest scientific advances with the wisdom gained from years of working with patients.

The program of this year's congress is designed to highlight the key points of our practice through a dialogue of top experts in the field of:

*- **Oncology and Surgery:** We will consider the synergy of surgical precision and modern oncology protocols. The focus is on a multidisciplinary approach where surgery lays the foundation and personalized oncology care provides a pathway to healing.*

*- **Nursing education:** We will discuss the modernization of the curriculum and the importance of continuous training, the competencies of nurses as well as the harmonization with European standards and directives. Knowledge is the only way to provide professional autonomy and authority in clinical practice.*

*- **Cardiovascular diseases, anesthesia, intensive care and hemodialysis:** Through the prism of the cardiovascular concept, we will analyze how the teamwork of doctors and nurses directly affects the survival and quality of life of patients with complex vascular pathologies. Of particular importance will be the scope of work of nurses in intensive care, as well as a significant segment of continuous hemodialysis procedures within them.*

*- **Midwife and Neonatology:** The First Beats of Life. We dedicate this panel to those who hold the hand of a mother and are the first to accept a new life. The discussion will include the synergy of traditional midwifery skills and state-of-the-art neonatal protocols. The focus is on humanizing childbirth with maximum safety, where the midwifery experience recognizes subtle changes that technology can sometimes overlook.*

- **Patronage services:** *Synergy in the heart of the family. A community nurse is a bridge between the health institution and the home. In this panel, we explore how academic knowledge in the field of public health is transformed into concrete family support. We will discuss the importance of early intervention, breastfeeding support and parent education, where patronage service becomes a key factor in prevention and preservation of the health of the entire community. The panel will highlight the importance of prevention and education of families in the everyday environment and point out the importance of public health.*

Our Common Mission

The Congress is a platform where two key pillars of our profession meet: the power of innovation (digitalization and evidence) and the power of tradition (ethics and intuition).

I believe that knowledge without experience remains a theory, and experience without new knowledge risks stagnation.

“Synergy is the energy that arises when differences are acknowledged and combined for a higher purpose.”

I encourage you to be an active participant in the exchange of ideas. Let every panel discussion and every conversation during breaks be one step closer to our common goal – providing the highest quality possible care to everyone.

Thank you for making this gathering a center of excellence with your presence, work and dedication.

I wish you successful, constructive and inspiring work!

of Nurses, Technicians and Midwives*

(PIB 101074633 , MB 07155930)**

AKREDITOVANA KOTIZACIJA se uplaćuje uz cenu boravka na profakturu koju dobijate od hotela na ime učesnika. Učesnici koji ne izmire kotizaciju prema organizatoru biće uskraćeni za prisustvovanje predavanju, izlaganju svog stručnog saopštenja i potvrde o učešću na skupu.

Dolazak učesnika na kongres je u individualnoj organizaciji.

**Učesnici skupa su u obavezi da pri registraciji ostave podatke:
broj licence, identifikacioni broj ogranka, broj telefona,**

Tehnička uputstva za učesnike:

- Trajanje okruglih stolova po programu i satnici je predviđeno od 60 minuta do 180 minuta u zavisnosti od broja predavača sa diskusijom i evaluacijom.
- Prezentacije dostaviti organizatoru 60 minuta pre početka predavanja
- Trajanje stručnih saopštenja 5- 7 minuta.
- Postavka postera sat vremena pre predviđenog termina u programu.

Važno obaveštenje za učesnike

Prilikom registrovanja na recepciji hotela u kome ste smešteni proverite da li parking mesto pripada hotelu ili je zonirano mesto.

Online pristup materijalima:

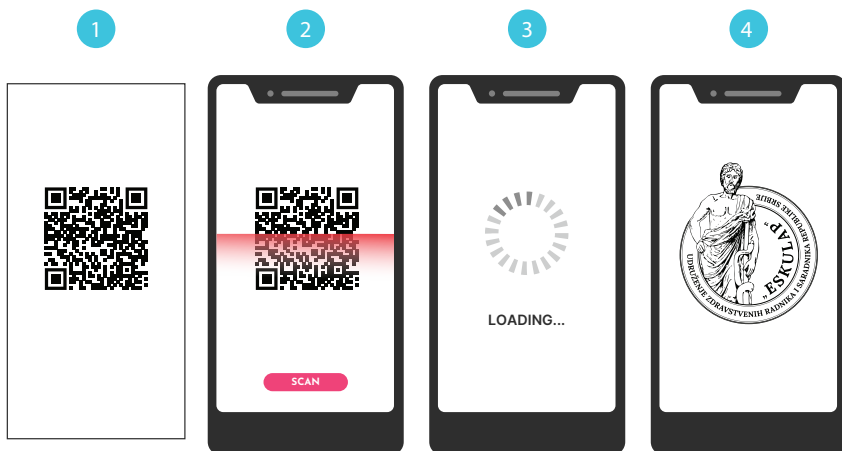

Kreiran je poseban poddomen na našem sajtu:

informacije-i-prijava-kongres-2026.eskulap.rs

gde će se objavljivati sve relevantne informacije i materijali.

Da bismo vam omogućili lakši pristup, svim učesnicima će biti dostupni QR kodovi na ID karticama, kao i na drugim materijalima tokom kongresa.

Jednostavnim skeniranjem ovih kodova mobilnim telefonom ili sličnim uređajem, bićete automatski usmereni na pomenutu stranicu.

1. Pronađite QR kod
2. Skenirajte QR kod telefonom
3. Sačekajte da se stranica učita
4. Pristupite informacijama i materijalima

Razumemo da možda niste svi upoznati sa ovom tehnologijom, ali ne brinite, naš tim će biti na raspolaganju da vam pruži sve potrebne informacije i podršku oko korišćenja QR kodova.

Važno je da svi učesnici imaju pristup svim materijalima kako bi maksimalno iskoristili svoje učešće na kongresu.

Radujemo se vašem dolasku i nadamo se da će vam ova mogućnost olakšati pristup svim informacijama i materijalima.

DOBRODOŠLI NA ZLATIBOR!

Online Access to Materials:

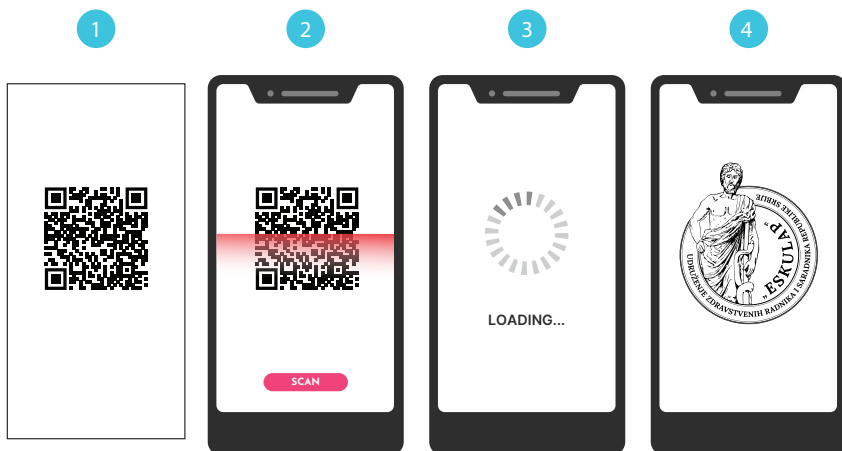

A dedicated subdomain has been created on our website:

informacije-i-prijava-kongres-2026.eskulap.rs

All relevant information and materials will be published there.

To make access easier, QR codes will be available to all participants on their ID badges, as well as on other congress materials.

By simply scanning these codes with a mobile phone or a similar device, you will be automatically directed to the page mentioned above.

1. Locate the QR code
2. Scan the QR code with your phone
3. Wait for the page to load
4. Access the information and materials

We understand that not everyone may be familiar with this technology, but there is no need to worry. Our team will be available to provide any information and support you may need regarding the use of QR codes.

It is important that all participants have access to all materials in order to make the most of their participation in the congress.

We look forward to welcoming you and hope that this option will make access to all information and materials easier and more convenient.
